

Education and Culture DG

Lifelong Learning Programme

Dear Sir / Madam ,

I'm very glad to contact you by presenting the **Save or Lose** Project .

I'm going to coordinate this project through the 2013-2015 years and this is an official offer to you for a LLP – Comenius Multilateral Projects .

My name's Güven Bozdağ and I'm an English Language Teacher .

I'm experienced enough with the whole works so far and I'll take the all responsibilities .

I work at Atatürk Primary School which takes place in the Central Region of Turkey, in a beautiful city, Niğde in Cappadocia with over 1000 students aged 10-14 and 62 academic staff in one building surrounded by a gym, library and recreational garden

Our school, having the principle of the constructivist approach to education, adopts an approach of student centered learning system using the method of active learning with a talented staff. The management structure of the school is focused on public responsibilities.

- *If you are interested in , please reply as soon as possible to saveorlose@yahoo.com or forward this draft to your colleagues or friends .*
- *If you have an on-going project , please inform me if you need participant instead.*
- *Links of my school and place I live in .*

Save or Lose Project

Climate change and Global warming is happening, and their impact on all of us is growing. Have you noticed the weather becoming more extreme in your country, or on television?

Does it seem to be warmer in the winter, with less snow and more rain?

Do you feel that spring is coming a little earlier each year, with flowers blooming or birds arriving before you expect them?

These are all signs of accelerating climate change, or global warming as it is also known.

If we do not take action to stop it, during the course of this century global warming is almost certainly going to change the world we live in dramatically and alter our way of life.

Millions of people's lives could be put in danger.

This is a global problem, and yet each of us has the power to make a difference.

Even small changes in our behaviour can save energy and resources and help prevent greenhouse emissions, without affecting our quality of life.

Through this project , our children will learn how to **Save** our Earth and find ways not to **Lose** it.

Some of the Purposes of the **Save or Lose** Project

- To determine the effects of economical, cultural, social and politic views of life on climate change in project partner countries.
- To examine the visible effects of global warming on regional climate change by our children.
- To create climate and project corners and panels at schools.
- To produce and publish the determined precautions by our children .
- To raise the consciousness for the changes .
- To determine the similarities and differences of climatic issues between the partner countries.

Great Moments and Furthermore in Niğde / Cappadocia Through Your Visit ☺
