<p>Presentation title</p>	<p>Mission and Position of Professional Higher Education in the European Higher Education Area</p>
<p>Short abstract * (include relation to the RESULTS/ACHIEVEMENTS bullet points of the seminar below)</p>	<p>New skills needed for the present and future development of society in general and labour market in particular cannot be achieved through traditional education methods, nor can they be measured by the student's ability to copy the professor's statements. The presentation will focus on the broader concept of "Competences", rather than mere knowledge, and will include some basic principles on how to educate for "Competences as Learning Outcomes", as well as on the resistance to this paradigm around us and within us.</p>

Needed equipment	Computer, beamer
Language of presentation	English
Remarks	

***RESULTS/ACHIEVEMENTS:**

- understanding LO,
- implementation of LO,
- evaluation of study programmes with focus on LO,
- presentation of changes of Recognition and Assessment of Education in the Republic Slovenia (by ENIC-NARIC representatives) with a view to access to the labour market to all stakeholders,
- **presentation of procedures in other countries – examples of good practice.**
