Short Description of the Company / HEI	Aquarium Pula is the biggest private public aquarium in Croatia, with a 10 year history of constant growth and improvement. An important part of the Aquarium are the educational programmes, where high school students (mostly from Germany) have an opportunity to learn about marine life and oceanography of the Adriatic Sea through different workshops. These workshops include a biological part, where attendees are introduced to different groups of marine organisms typical for the Adriatic, and a chemical – physical part, where they learn basic things about chem. – phys. features of the sea. The programme also includes a guided tour of the aquarium and field work on the coast (tidal zone) with snorkeling.
