

Dear Valued Partner,

Over the period of 2012 we have experienced a great demand for work within the UK from EU students looking for un paid and paid internships from as little as 1 week up to 6 months.

Since then, the variation of students coming to us has been great, as we have not only experienced qualified, highly literate and confident students, but we have also met students who are shy, limited language skills and no element of career behind them.

Due to this, we have managed to develop some excellent relationships with a variation of WORK EXPERIENCE programs across the UK help students to develop their skills and progress them into a future permanent placement.

We are now introducing this to our partners to offer to their students after they have completed their ENGLISH language courses within your school or at any other destination. This has been established for many years now and we have been able to offer it now not only to our students but to yours as well. We offer a practical experience within the countryside and also industry specific experience.

Attached are the offers that we have for you and your students. In addition to the offers, we will give you the following support:

- full job description for each placement (office placements)
- Update calls to the students placement for reviews (both)
- induction before entering the placement (office placements)
- Skype, face to face or e-mail process to advise how to obtain your placement (practical placements)
- References (both)

If you require further information please contact us here at WORLD CHOICE EDUCATION (WCE)
