

**WBS TRAINING AG** is one of the most important German vocational training and service providers. Mostly, the WBS is delivering professional education promoted by public national authorities, business training and consulting for companies.

**Since 2004 WBS also cooperates as host organisation in the scope of the Lifelong Learning Programme (IVT, VETPRO, PLM). Over the years the WBS has completed more than 90 of these Leonardo mobility projects.**

We offer high level trainings in various fields - from information and communication technology to business administration, from automation engineering to social services. These trainings can be organized in English and German.

Furthermore we also arrange internship placements especially in the field of hotel/gastronomy, engineering and nursing. Further placements upon request. Here German is mandatory.

Most of the Lifelong Mobility Trainings take place in the beautiful town of Dresden, which combines astonishing architectural sights with a charming landscape. As Dresden is located in the heart of Europe, you also have easy access to other important European cities like Berlin and Prague.

WBS can look back to more than 30 years of experience in many fields of vocational training and consulting. We are operating in more than 100 locations throughout Germany with about 600 employees and more than 1.500 external training specialists.

**We are looking forward to prepare a Lifelong Mobility Project according to your individual needs and to get in contact with new educational institutions and partner organizations in your country.**
